

Smrutiranjana Patra

Full Stack Developer | Bhubaneswar, Odisha | +91 9776444262 | guessme.smriti@gmail.com

[LinkedIn](#) | [GitHub](#)

Full Stack Developer with 4+ years of experience building scalable web applications with Python (Flask), Node.js, and React/Next.js. Currently developing DCKAP Integrator, an iPaaS platform connecting B2B distributors with ERPs, e-commerce, and EDI systems. Skilled in designing REST APIs, asynchronous processing with Celery and Redis, secure authentication with JWT and OAuth 2.0, and relational and NoSQL database design. Delivered a **~20% improvement in application performance** and a **~40% reduction in developer onboarding time** through reusable systems and documentation standards. Strong focus on clean architecture, automated validation (pytest, Jest, React Testing Library, Vitest), and containerized deployment with Docker, Jenkins, and AWS.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3, SASS

Backend (Python): Flask, Flask-RESTful, SQLAlchemy (ORM), Flask-Migrate (Alembic), Marshmallow / Pydantic (validation & serialization), Flask-JWT-Extended, OAuth 2.0, Celery & Celery Beat (async & scheduled tasks), Gunicorn

Additional Backend: Node.js, Express.js

APIs & Integrations: RESTful API Design, OpenAPI/Swagger, Webhooks, JSON, XML, EDI, ERP & E-commerce Integrations

Frontend: React.js, Next.js, Redux Toolkit, Zustand, Context API, Tailwind CSS, shadcn/ui, Bootstrap

Databases: PostgreSQL, MySQL, MongoDB, Redis (caching & message broker)

Testing & Code Quality: pytest, pytest-mock, coverage.py, Jest, Vitest, React Testing Library, Black, Flake8

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), boto3, Docker, Docker Compose, Nginx, Jenkins (CI/CD), Git, GitHub

Tools: Postman, Jira, Flower (Celery monitoring), Poetry / pip / virtualenv

Core Concepts: API Design, System Architecture, Asynchronous Processing, Caching Strategies, Performance Optimization (query optimization, code splitting, lazy loading, memoization)

Currently Exploring: LLM APIs, Prompt Engineering, RAG Fundamentals

Work Experience

Dckap Technologies

DCKAP Integrator, an iPaaS integration platform for B2B distributors

Product Developer II | July 2024 – Present

- Designed and built a System versioning and deprecation management service, **reducing technical debt** through controlled phase-out of legacy endpoints and dependencies.
- Boosted application performance by **~20%** through modular splitting, lazy loading, and memoization on the frontend, alongside database query optimization.
- Implemented secure authentication and authorization flows using JWT for user sessions and third-party connector integrations.
- Containerized services with Docker and maintained Jenkins CI/CD pipelines for automated test runs and deployment to AWS.

Product Developer I | August 2022 – July 2024

- Built a unified "Projects" module end to end, covering Flask APIs, the database schema for shared

and personal assets with access control, and the React interface, streamlining navigation and data access for users.

- Developed automated credential mapping and bulk import/export of integration configurations, using Celery and Redis to process long-running jobs asynchronously and reduce manual setup time.
- Engineered a reusable Snippets UI system and standardized error-handling contract between API and frontend layers, **eliminating redundant logic** across the platform.
- Implemented server-side pagination and optimized database queries to keep performance smooth on large datasets.
- Refactored legacy React class components into functional components with hooks, **enhancing rendering speed and memory efficiency**.
- Established documentation standards for internal APIs and UI libraries, **reducing new-hire onboarding time by ~40%**.
- Introduced automated unit and integration tests with pytest, Jest, Vitest, and React Testing Library, **increasing software stability and mitigating production defects**.

Influx Worldwide

Associate Software Developer | April 2022 – August 2022

- Automated dynamic report generation based on user inputs, **reducing manual effort** and streamlining operational workflows.
- Identified and resolved critical production bugs, **strengthening platform uptime**.
- Optimized build configuration with Babel, **improving bundle execution speed** and maintainability.

Key Achievements

- Honored as **Employee of the Quarter (Q3 2025)** at DCKAP Technologies for consistent delivery and high-impact full-stack contributions.
- Promoted from Product Developer I to Product Developer II (July 2024).
- Mentored 2 junior developers on full-stack best practices, code reviews, and testing standards.

Education

Amity University, Uttar Pradesh

Master of Computer Applications (MCA), Artificial Intelligence & Machine Learning (Online)
2025 – Expected 2027

Utkal University, Odisha

Bachelor of Commerce (B.Com), Accounting
2017 – 2021

Certifications

MERN Stack Web Development Training

Masai School | 2021 – 2022
