Frontend Developer with 4+ years of experience building scalable, high-performance web applications using React.js, Next.js, and the MERN stack. Expertise in component architecture, performance optimization, and state management (Redux, Zustand), delivering measurable impact including **~20% improvement in application performance** and **~40% reduction in onboarding time through improved documentation and reusable systems**. Proven track record in developing enterprise-grade UI solutions for EDI and e-commerce platforms, enhancing code quality and developer productivity. Strong focus on clean code, unit testing (Jest, React Testing Library), and maintainable frontend architecture.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS, Python.

Frontend: React.js, Next.js, Redux Toolkit, Zustand, Context API, Hooks

Backend: Node.js, Express.js, REST APIs

UI & Styling: Tailwind CSS, Bootstrap, Responsive Design, Cross-Browser Compatibility

Testing: Jest, React Testing Library, Unit Testing, Integration Testing

Tools & DevOps: Git, GitHub, GitLab, Postman, Jira, Docker, CI/CD

Databases: PostgreSQL, MongoDB, MySQL.

Core Concepts: Performance Optimization, Code Splitting, Lazy Loading, Memoization, State Management, Component Reusability, System Design

Work Experience

Dckap Technologies

Product Developer II | July 2024 - Present

- **Architected and implemented** a modular, high-performance UI framework for enterprise-grade applications, focusing on long-term maintainability and component reusability.
- **Engineered frontend performance optimizations** (including code-splitting and memoization), resulting in a **20% increase in application speed**.
- **Version Control & Lifecycle Management:** Designed a custom System Management utility to manage API versioning and deprecation, **reducing technical debt** by successfully phasing out legacy dependencies.

Product Developer I | August 2022 - July 2024

- **Centralized Project Management:** Developed a unified "Projects" module for managing shared and personal assets, which **increased user workflow efficiency** by streamlining navigation and data access.
- **Workflow Automation:** Built robust data-handling features, including automated credential mapping and seamless import/export functionalities, reducing manual configuration time for users.
- **UI System Standardization:** Engineered a **Reusable Snippets UI System**, which eliminated code duplication and standardized error-handling protocols across the entire platform.
- **State & Performance Optimization:** Enhanced UI stability by implementing sophisticated state management patterns and optimized pagination, ensuring seamless performance across large data sets.

Influx Worldwide

Associate Software Developer | April 2022 - August 2022

- Automated **dynamic report generation** based on user inputs, reducing manual effort and improving operational efficiency
- Identified and resolved **critical production bugs**, improving system reliability and performance
- Optimized build configuration using **Babel**, improving application performance and maintainability.

Key Achievements

- Awarded *Employee of the Quarter (Q3 2025)* for outstanding performance, consistent delivery, and high-quality frontend development contributions
- Mentored junior developers, improving **team productivity and code quality standards**
- Implemented **unit testing using Jest and React Testing Library**, improving code reliability and reducing production issues
- Contributed to **knowledge sharing and best practices adoption** within the development team

Impact Highlights

- **Enterprise UI Systems:** Designed and deployed scalable components used across multiple product lines to ensure design consistency.
- **System Optimization:** Refactored legacy React components into functional hooks, leading to a significant increase in rendering speed and memory efficiency.
- **Developer Experience:** Established documentation standards for internal APIs and UI libraries, reducing onboarding time for new hires by 40%.

Education

Master of Computer Applications (MCA), Artificial Intelligence & Machine Learning (Online)

Amity University, Uttar Pradesh, India
2025 – Expected 2027

Bachelor of Commerce (B. Com), Accounting

Utkal University, Odisha, India
2017 – 2021

Higher Secondary (Commerce)

Samanta Chandra Sekher Junior College, Odisha, India
2015 – 2017

Secondary School (Class X)

Puri Zilla School, Odisha, India
2015

Certifications

MERN Stack Web Development Training

Masai School, India | 2021 – 2022
